

DATASHEET

Imprivata Digital Identity Architecture Certification Program

In today's everchanging world digital identity has become more of a focus than ever before. With Imprivata Education Services we can help you become an industry leader and help transform your enterprise's digital identity.

In today's highly complex IT environments, digital identity is the cornerstone of a modern security strategy.

Organizations are dealing with unprecedented complexity, with more users and roles requiring immediate access to applications from countless locations across diverse devices. As a result, traditional perimeter-based security models are no longer sufficient for reducing risk, meeting compliance requirements, and ensuring fast, efficient workflows for end users. In this new "perimeter less" environment, it is essential to enable, control, and monitor all digital identities across the organization.

However, formulating a digital identity strategy—defining functional requirements, identifying comprehensive technology solutions, devising a rollout plan—can be a daunting proposition. But their expertise of modern, identity-centric approaches to information security. This program will help grow your knowledge of the Imprivata Digital Identity Framework and enable you to learn from our highly skilled educators through the sharing of insights, best practices, and cautionary tales. Along with helping you learn all about digital identity and its place in your organization's overall security and risk management framework, this program will help you learn how to develop a digital identity strategy and architecture for your own organization.

Imprivata Digital Identity Architecture Program

Imprivata Education Services offers a Digital Identity Architecture Program to help IT and information security professionals develop and expand their expertise of modern, identity-centric approaches to information security. This program will help grow your knowledge of the Imprivata Digital Identity Framework and enable you to learn from our highly skilled educators through the sharing of insights, best practices, and cautionary tales. Along with helping you learn all about digital identity, the program can serve as a career steppingstone, as you'll receive industry-recognizable certification upon completion.

Once enrolled, you'll start your journey with like-minded individuals during the Program Kick-Off. It provides an introduction, expectations, and timeline for your certification and graduation from the program. Following that, you will participate in our instructor-led Digital Identity Fundamentals, which help you gain further knowledge through multiple video conference sessions focused on:

- The basis for Digital Identity Frameworks
- Building a digital identity strategy

Imprivata solutions fundamentals

In addition to the instructor-led courses listed above, our Solutions Fundamentals classes will provide information on the following through presentations and hands-on demos:

- Imprivata Identity Governance – provides a policy-based approach to simplify and accelerate secure role-based and least privileged access to systems and applications
- Imprivata Mobile User Access – healthcare’s only mobile authentication solutions that enables fast, secure access to clinical mobile devices and applications
- Imprivata OneSign® – an innovative, award-winning solution that streamlines and simplifies healthcare access management by enabling single sign-on to all clinical and non-clinical applications
- Imprivata Confirm ID® – improves security by enabling two-factor authentication for remote network access, cloud applications, Windows servers, and desktops, and other critical systems and workflows
- Imprivata PatientSecure – the positive patient identity solution that creates a critical 1:1 match between individual patients and their unique medical records
- Imprivata Privileged Access Management (PAM) – addresses critical security and compliance challenges by protecting privileged administrator access to an organization’s most sensitive IT systems and digital assets
- SecureLink Enterprise Access – a subset of PAM, this Imprivata solution focuses on high-level external threats that come from an organization’s reliance on external partners (vendors or third parties) to support, maintain, or troubleshoot certain technologies and systems inside their corporate network

Your digital identity architecture certification has two options; a fundamentals certification or the architecture certification will conclude with a capstone project and **an exam** based on the prior coursework focused on enabling, controlling, and monitoring all identities to deliver fast user access, improve security, and ensure compliance.

Program highlights and benefits

We strive to instill knowledge from our experience and best practices to help assist, benefit, and educate you and your team. Imprivata Digital Identity Architecture certification will improve your expertise in digital identity fundamentals in coordination with Imprivata solutions. In turn, this expertise can further advance your career in IT security, while helping your organization maximize the ROI of its solutions.

Highlights and benefits of the program include:

- Approximately 115 hours of classes over six months
- Program certification awarded in the following areas:
 - Digital Identity Framework Fundamentals
 - Imprivata Solutions Fundamentals
- Supplemental eLearning library focusing on access, authentication, compliance, governance, privacy, privileged access, risk analytics, and security
- Access to the Imprivata Learning Management System environment
